

PRODUCT INFORMATION

Are you paying a crew to wait around while the concrete sets up?

Description:

Get-Set is a proprietary ready-mixed concrete from CBM designed to solve cold weather delays. Different formulations, utilizing non-chloride admixtures, allow **Get-Set** to achieve significantly improved set times even in the dead of winter.

With **Get-Set** you can decrease concrete set times by as much as 35%. This can often mean the difference between waiting an entire season and finishing a project ahead of schedule.

All **Get-Set** mixes conform to applicable CSA and ASTM requirements.

Why use Get-Set?

When concrete set times are delayed because of cold weather it can increase your project costs. A little extra now can save a lot of headaches later. **Get-Set** can provide you with the following benefits.

Get-Set Benefits:

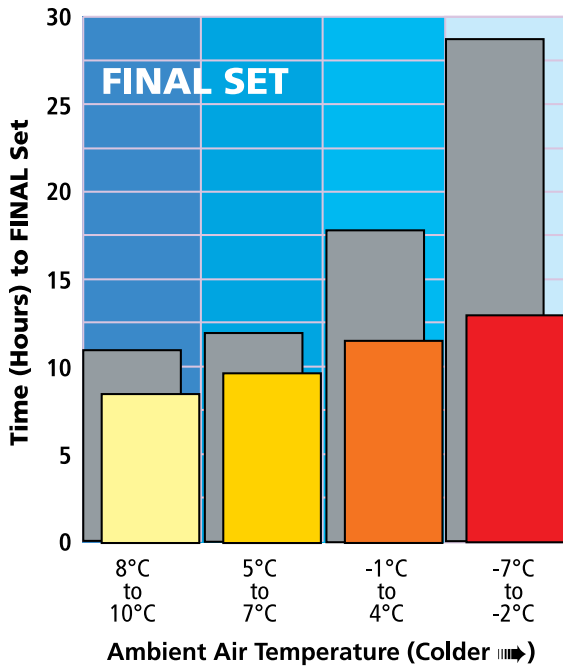

- Reduced labour costs
- Reduced equipment costs
- Reduced scheduling costs
- Summer-like concrete performance in winter conditions
- Less bleed water
- Improved finishability
- Reduced overtime labour costs
- Reduced heating, insulating and protection costs
- Excellent early and ultimate compressive and flexural strengths
- Better surface appearance

Contractors and owners will see the added benefits of **Get-Set** in relation to quality, convenience, and profit.

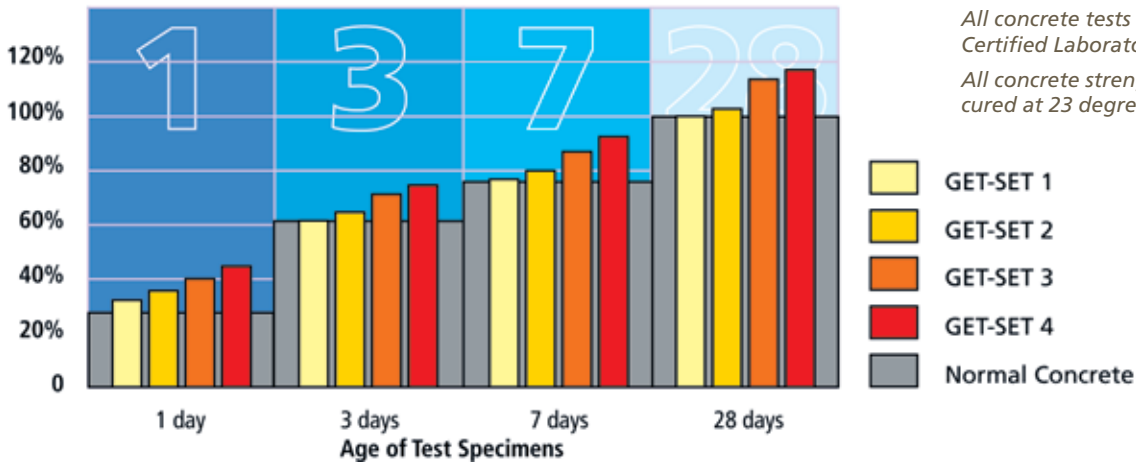

ENGINEERING DATA

Get-Set™ is the right choice for summer-like performance in cold weather.

Performance Characteristics:

Compressive Strength Comparison (% of 28 day compressive strength of normal concrete)

All concrete tests were performed by a CSA Certified Laboratory.

All concrete strength specimens were lab cured at 23 degrees C
