**PRODUCT DESCRIPTION**

St Marys Type HE cement is a High Early cement appropriate for applications where high early strength is desired.

**BASIC USE**

Portland cement is the binding ingredient used in concrete mixes with or without supplementary cementitious materials. Type HE is a high early strength cement which has been extensively utilized in precast concrete manufacturing to allow quick form turnaround time. It is also used in cast-in-place applications where it is desired to put the concrete element into service rapidly or during cold weather conditions.

**TECHNICAL DATA****APPLICABLE STANDARDS**

- CSA A3001 – Cementitious Materials for Use in Concrete

**PRECAUTIONS**

Avoid contact with eyes. Contains Portland cement, which when mixed with water creates a calcium hydroxide solution. If splashed in eyes or skin, flush thoroughly with water. Avoid contact with skin, including contact with saturated clothing. Persistent discomfort requires prompt medical attention. For more information, reference the applicable Safety Data Sheet (SDS). The SDS should be consulted prior to use of this product and is available upon request or online at [www.stmaryscement.com](http://www.stmaryscement.com)

**AVAILABILITY**

St Marys HE cement is available in bulk or packaged form. Contact manufacturer for information on distribution and availability.

**WARRANTY**

Manufacturer will provide mill test certification that product meets and exceeds applicable CSA specifications.

St Marys Cement will not guarantee finish work, having no control over the use of this product.
