**PRODUCT DESCRIPTION**

St Marys Type N Masonry Cement is a special formulation of hydraulic cement produced specifically for use in mortar for unit masonry construction.

**BASIC USE**

St Marys Type N Masonry Cement is recommended for use where moderate strength, such as exposed loadbearing and non-loadbearing masonry walls, veneer walls, above or below grade masonry and for tuck-pointing, is required.

St. Marys Type N Masonry Cement is packaged in 70 lb (1 cubic foot) bags to enable the mason contractor to accurately proportion mortar on-site to conform to ASTM C270.

A good rule of thumb is to use a Type N mortar unless there is a structural or specification requirement to use a higher strength.

**TECHNICAL DATA****APPLICABLE STANDARDS and CODES**

- ASTM C91– Standard Specification for Masonry Cement
- ASTM C270– Standard Specification for Mortar for Unit Masonry
- TMS 402- Building Code Requirements for Masonry Structures

**PRECAUTIONS**

Avoid contact with eyes. Contains Portland Cement, which when mixed with water forms a calcium hydroxide solution. If splashed in eyes or skin, flush thoroughly with water. Avoid contact with skin, including contact with saturated clothing. Persistent discomfort requires prompt medical attention. For more information, reference the applicable Safety Data Sheet (SDS). The SDS should be consulted prior to use of this product and is available upon request or online at [www.stmaryscement.com](http://www.stmaryscement.com).

**AVAILABILITY**

St Marys Type N Masonry Cement is available in bulk or packaged form. Contact manufacturer for information on distribution and availability.

**WARRANTY**

Manufacturer will provide mill test certification that products meets and exceeds applicable ASTM specifications.

St Marys Cement will not guarantee finish work, having no control over the use of this product.
