PRODUCT DESCRIPTION

The St Marys Type S Masonry Cement is a special formulation of hydraulic cement produced specifically for use in mortar and in unit masonry construction.

BASIC USE

St Marys Type S Masonry Cement is recommended for use where higher mortar strength is required to match higher masonry unit strength, such as for veneers, parging, foundation walls, and walls designed for higher strength.

TECHNICAL DATA

APPLICABLE STANDARDS

- ASTM C 91 – Standard Specification for Masonry Cement
- ASTM 270 – Standard Specification for Mortar for Unit Masonry
- TMS 402- Building Code Requirements for Masonry Structures

PRECAUTIONS

Avoid contact with eyes. Contains Portland Cement, which when mixed with water forms a calcium hydroxide solution. If splashed in eyes or skin, flush thoroughly with water. Avoid contact with skin, including contact with saturated clothing. Persistent discomfort requires prompt medical attention. For more information, reference the applicable Safety Data Sheet (SDS). The SDS should be consulted prior to use of this product and is available upon request or online at www.stmaryscement.com

AVAILABILITY

St Marys Type S Masonry Cement is available in bulk or in packaged form. Contact manufacturer for information on distribution and availability.

WARRANTY

Manufacturer will provide mill test certification that products meets and exceeds applicable ASTM specifications.

St Marys Cement will not guarantee finish work, having no control over the use of this product.
